

SUSTAINABILITY

Beijing Innovation Telecom Technology Co., Ltd. places high priority on environmental protection and sustainability. Our corporate culture is characterized by its long-term orientation and holistic approach. Our ethical business practices are set down in our business and ethics code and apply. Honesty, fairness, respect and full awareness of our social responsibility – this is what we base our activities on in all countries and cultures where we do business.

We use natural resources carefully, and make sure to keep our CO2 footprint – created mostly through production and logistics – as small as possible. We use a systematic quality and environmental management system that ensures all international standards are adhered to.
